

RAHUL

Computer Science & Engineering Student | IUB, Bangladesh

Email: your.email@iub.edu.bd Phone: +880 XXXXXXXXXX GitHub: github.com/your-username
Dhaka, Bangladesh

CAREER OBJECTIVE

Motivated Computer Science & Engineering student at Independent University, Bangladesh, seeking an internship or entry-level opportunity in software development or IT. Demonstrated ability to build full-stack web applications, work with AI/NLP tools, and deliver team-based software projects under tight deadlines. Eager to contribute technical skills and grow through hands-on industry experience.

EDUCATION

B.Sc. in Computer Science & Engineering

2022 – Present

Independent University, Bangladesh (IUB)

- CGPA: **3.35 / 4.00**
- Relevant Courses: Operating Systems, Theory of Computation, System Analysis & Design, Web Applications & Internet, Modern Sensor Technology

PROJECTS

ResumeSmart – AI-Powered Resume Screening Web App

2024 – 2025

- Built a full-stack web application using Flask (Python) that automatically screens resumes using a custom TF-IDF NLP engine — no external AI APIs, per instructor requirement
- Implemented PDF parsing (pdfplumber), keyword extraction (spaCy), and candidate ranking from scratch
- Integrated a Groq-based AI chatbot for recruiter interaction
- Deployed live at resumesmart.onrender.com; sole developer handling architecture, backend, and deployment

Blind Navigation Assistant – IoT Hardware Project

2025

- Designed and built a wearable navigation device for visually impaired users using ESP8266, HC-SR04 ultrasonic sensor, DFPlayer Mini (audio feedback), and NEO-6M GPS module
- Resolved SoftwareSerial conflicts and SD card compatibility issues through hands-on hardware debugging

Flood Early Warning System – Group Project

2024

Team Lead · 4 Members

- Led a 4-member team to design a complete system using DFDs, UML use case, activity, and sequence diagrams
- Delivered full System Analysis & Design documentation including CRUD matrix and requirement specifications

AI Mental Health Monitoring System – Group Project

2024

Team Lead

- Led development of a web-based mental health monitoring platform using HTML, PHP, CSS, and JavaScript
- Coordinated team tasks, managed code integration, and delivered final presentation

Catering Service System – OOP Course Project

2023

- Designed and implemented a Java-based catering service system applying OOP principles: inheritance, encapsulation, and polymorphism

Multi-threaded & Process-based OS Programs

2025

- Implemented fork/pipe IPC, Win32 processes, pthreads, multilevel queue scheduling, and real-time scheduling (RM & EDF) in C and Java
- Developed a Linux kernel module as part of Operating Systems coursework

TECHNICAL SKILLS

Languages:	Python, C, Java, JavaScript, HTML, CSS, PHP
Frameworks:	Flask, Bootstrap
AI / NLP:	spaCy, scikit-learn, TF-IDF, pdfplumber
Tools:	Git, GitHub, Linux, VS Code
Hardware:	ESP8266, HC-SR04, NEO-6M GPS, Arduino IDE
Databases:	MySQL (basic), SQLite
Design:	Graphic Design (Canva, Photoshop – basic), Figma (basic)

LEADERSHIP & ACTIVITIES

Graphics Designer – University Club

2022 – 2023

Independent University, Bangladesh

- Created promotional materials, event posters, and social media graphics for club activities
- Collaborated with club members to deliver consistent branding for events

KEY STRENGTHS

- Fast self-learner — taught myself Python, Flask, and NLP from scratch for a production web app
- Strong project execution — delivered multiple academic projects under deadline as team lead
- Problem-solver — debugged complex hardware and software issues independently
- Collaborative team player with experience leading 4-person project groups
